

How To: Use Your Apple

www.UpSurf.net
(207) 363-4181

Let us talk about:

- How to power on your Apple Computer.
- Anatomy of the Apple Desktop.
- What is the Docking Station?
- Where to find your Applications?
- Where to find Attached Devices?
- Quick Tutorial on how to backup.

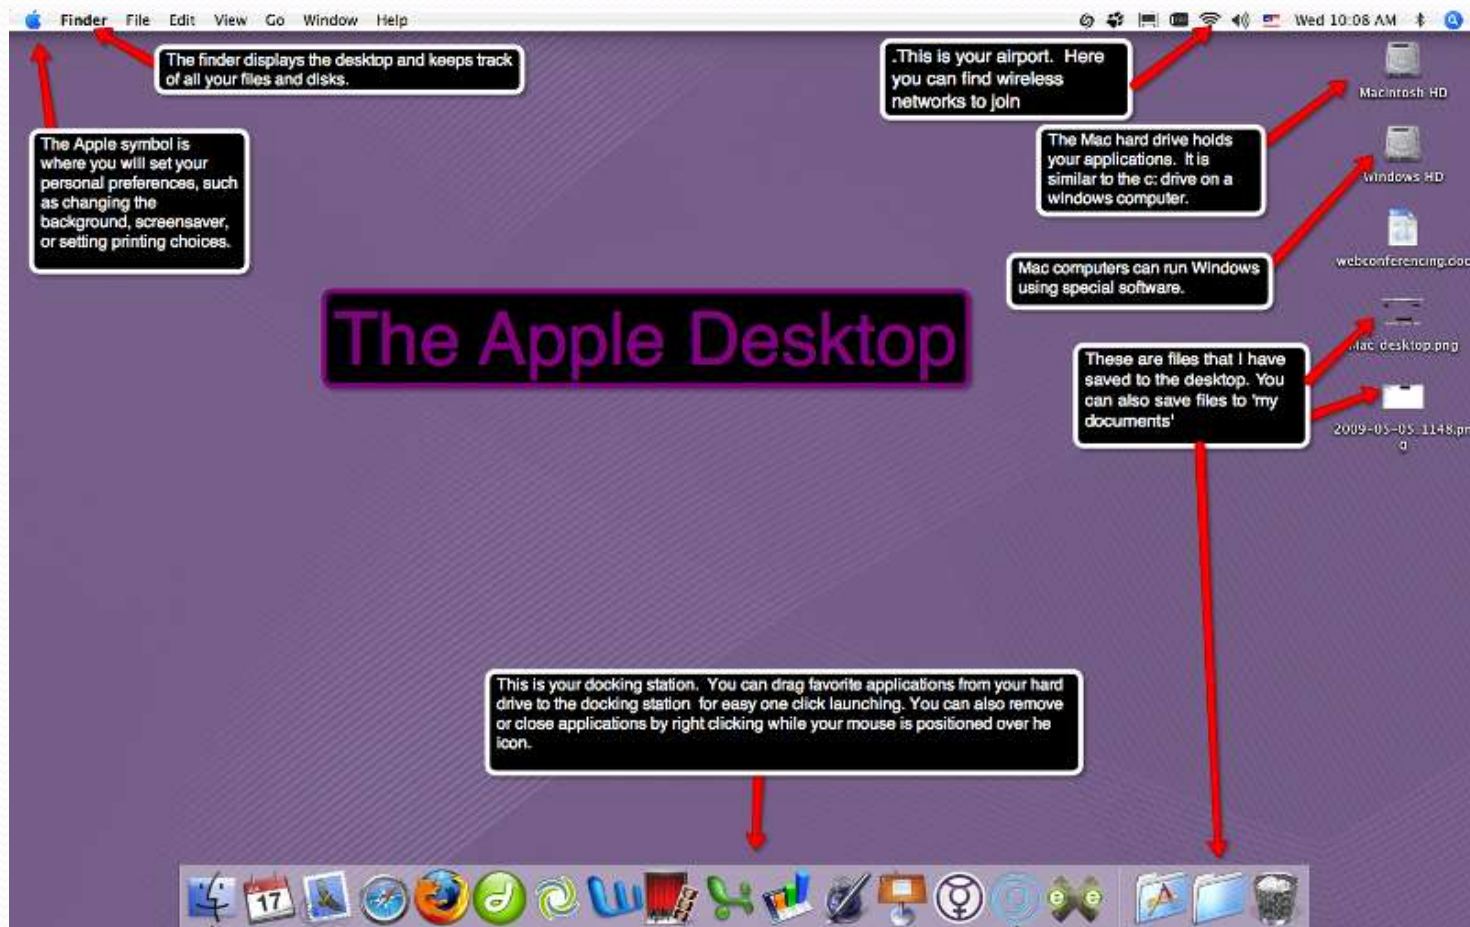

How to power on your Apple

The different makes and models of Apples will have their power buttons in different places.

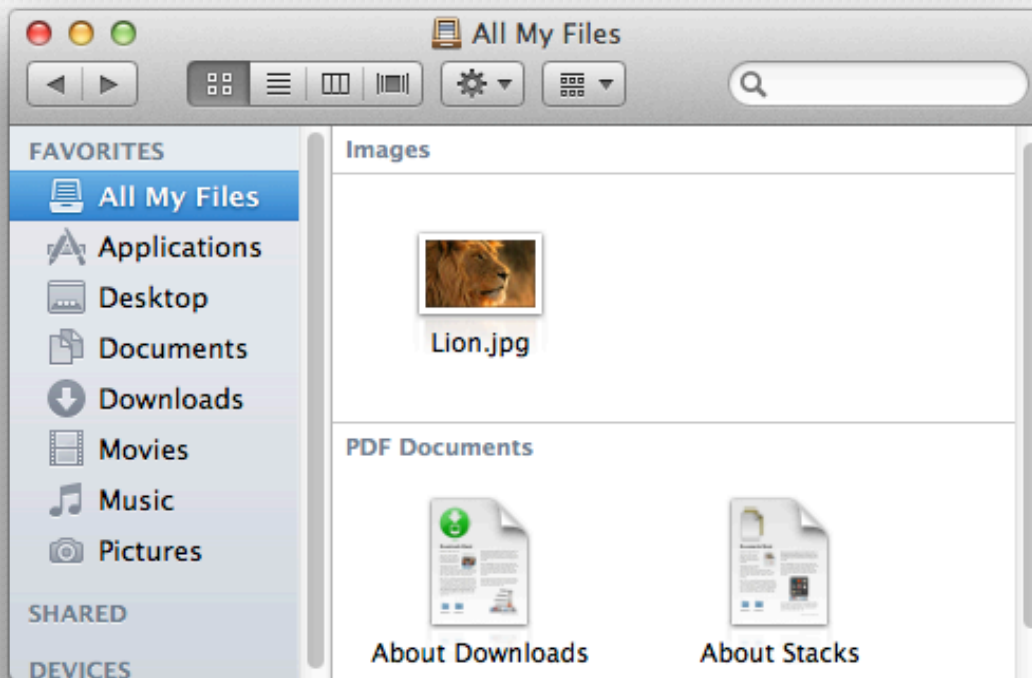

You should hear a tone when it starts...

Anatomy of the Apple Desktop

Where to find your Applications

- You can use Finder
- Or you can double click on the Hard Drive:

Where to find attached devices

Let's say you attached a USB Flash Drive, External Hard Drive, or some other type of external device to your Apple... Where do you find it?

How to Backup your Apple

(This Applies mainly to IMAC, MacBook and Desktops)

- Connect Apple Backup Certified Device.
- Open Time Machine if it does not automatically open.

Have a good night.
